

Quality Policy

As a preferred supplier to the Automotive and Electrical industries in sub-Saharan Africa, HellermannTyton is committed to delivering safe, conforming and reliable products and services that consistently meet customer expectations and support our strategic direction.

This Quality Policy provides the framework for our Business Management System (BMS), including the Quality Management System, and supports the establishment and review of measurable quality objectives. The BMS is implemented and maintained in accordance with ISO 9001:2015, IATF 16949:2016, applicable statutory and regulatory requirements, customer-specific requirements, and other obligations relevant to our products, services and operations.

Top management is accountable for the effective implementation and continual improvement of the BMS and commits HellermannTyton to:

- Understanding and fulfilling customer requirements, including applicable technical specifications and customer-specific requirements, while meeting all relevant statutory and regulatory obligations;
- Establishing and reviewing measurable business and quality objectives, monitoring performance and risks, and using management review to ensure that the BMS remains suitable, adequate and effective;
- Preventing defects, reducing variation and waste, managing product-safety and process risks where applicable, and continually improving the effectiveness of the BMS, our processes, products and services;
- Developing competent, quality-conscious employees through appropriate training, communication and empowerment, and encouraging every employee to take responsibility for quality and timely escalation of concerns.

This policy is maintained as documented information, communicated and understood throughout the organization, applied in our daily activities, reviewed for continuing suitability, and made available to relevant interested parties.
